Phone: (+1) 401-714-5728

Highly motivated backend engineer with over 6 years of professional experience seeking a challenging role to leverage expertise in backend development, data engineering, and database management. Committed to producing clean, efficient code. Capable of quickly adapting to unfamiliar technologies.

Work Experience

EDI Support/Developer

Comparatio - Remote

March 2023 to January 2024

- Collaborated on backend development and data engineering to translate EDI documents and perform ETL (Extract, Transform, Load) tasks, with occasional DevOps work.
- Frequently utilized various programming languages such as Delphi, C#, and JavaScript, while managing SQL databases and cloud computing via AWS and Azure.
- Performed troubleshooting, debugging, and general testing to clean up code and improve efficiency.
- Gathered technical requirements from customers, and regularly communicated with customers to ensure goals were accomplished and all issues were resolved.
- Connected clients with trading partners through various communication methods such as AS2, SFTP, FTP, and VAN.

Connection Certification Engineer

Logicbroker - Remote

January 2021 to January 2023

- Collaborated on backend development and data engineering to translate EDI documents and perform ETL (Extract, Transform, Load) tasks, with occasional DevOps work.
- Frequently utilized various programming languages such as JavaScript and C# while managing SQL databases.
- Determined optimal schedules and managed implementation for each project.
- Connected clients with trading partners through various communication methods such as AS2, SFTP, FTP, and VAN.
- Troubleshot incidents reported by end-users to schedule system changes and identify permanent solutions.

Programmer

B2BGateway - Hope Valley, RI

December 2017 to December 2020

- Collaborated on backend development and data engineering to translate EDI documents and perform ETL (Extract, Transform, Load) tasks, with occasional DevOps and front-end work.
- Frequently utilized various programming languages such as C#, Python, JavaScript, and HTML, while managing SQL databases and cloud computing via AWS.
- Performed troubleshooting, debugging, and general testing to clean up code and improve efficiency.
- Connected clients with trading partners through various communication methods such as AS2, SFTP, FTP, and VAN.
