Email melodytchi@outlook.com

Address Westerly, RI 02891

Efficient programmer with five years of professional experience in software development, EDI integration, and SQL database management. Experienced in analyzing, troubleshooting, and debugging existing programs. Detail-oriented with a focus on clean code and accurate results. Capable of quickly learning and applying new technologies. Looking to apply education and experience while further expanding skillset.

EXPERIENCE

Connection Certification Engineer

Logicbroker, Shelton, CT

Jan 2021 - Jan 2023

- Developed custom code to extract, transform, and load information within X12 files, EDIFACT files, JSON data, and XML data.
- Analyzed and adhered to EDI specifications to implement code capable of properly reading and outputting data in accordance with the specifications.
- Analyzed, troubleshooted, and updated existing code to repair issues within the code and keep its functionality consistent with current requirements.

Programmer

B2BGateway, Hope Valley, RI

Dec 2017 - Dec 2020

- Analyzed and debugged existing code to identify and repair issues, update or expand functionality per client requests or trading partner requirements, and provide summaries of the code's functionality.
- Implemented and maintained code capable of extracting, transforming, and loading information within X12 files, EDIFACT files, flat text files, and XML files.
- Analyzed and adhered to EDI specifications to implement code capable of properly reading and outputting data in accordance with the specifications.
- Utilized repositories to retrieve updated code, publish modifications to code, and research history of modifications to code.
