CAREER OBJECTIVE

Efficient programmer with five years of professional experience in software development and SQL database management. Experienced in analyzing, troubleshooting, and debugging existing programs. Detail-oriented with a focus on clean code and accurate results. Capable of quickly learning and applying new technologies. Looking to apply education and experience while further expanding skillset.

EXPERIENCE

CONNECTION CERTIFICATION ENGINEER — Logicbroker

Shelton, CT, *January 2021 – January 2023*

- Analyzed existing code to identify and repair issues, and debugged code to ensure any adjustments worked as intended.
- Wrote custom code to map data fields within EDI documents and JSON data according to retailer requirements.
- Followed specifications for EDI X12 format to read data within EDI files and write code to read and write information in accordance with these formats.

PROGRAMMER — B2BGateway

Hope Valley, RI, *December 2017 – December 2020*

- Analyzed existing programs to identify and repair issues, update or expand functionality, and provide summaries of functionality.
- Debugged programs to identify causes of various issues and to ensure adjustments functioned as intended.
- Utilized repositories to retrieve code, publish modifications, and research history of modifications.
- Followed specifications for EDI formats such as X12 and EDIFACT to read data within EDI files and write code to read and write information in accordance with these formats.
